

MAXIM 50

Enjoy suppressed shooting across the country. No 4473, no \$200 tax stamp, no photographs, and no fingerprints. Ship a Maxim® 50 straight to your door with few exceptions.

Most states classify muzzleloaders as "antique firearms," therefore a moderator permanently affixed is merely that – a moderator – not a silencer. Yet the Maxim 50 holds the same

benefits as a suppressed rifle: reduced recoil and hearing safe sound results.

Increase your hunting season by days (even weeks) with the Maxim 50. Make your shot with certainty; watch it all the way through. With a 2/3 reduction of smoke (compared to non-moderated muzzleloaders), you'll never lose sight of your game.
